

**Joel Vyduna, *Director*, LUMINATE**

Since 2004, Mr. Vyduna has held several technical, commercial, and management positions in the energy storage, renewables, bioenergy, and conventional power industries. He currently leads Luminate's energy storage practice where he has managed independent engineering reviews, provided construction monitoring, conducted emerging technology evaluations, and provided development advisory services for over 2 GW of energy storage projects and several GW of power generation projects. Prior to joining Luminate, Mr. Vyduna held various leadership positions for Kiewit Power in the United States and Canada. He holds a Bachelor of Science in Construction Engineering and Management with Mechanical and Electrical Engineering Emphases from Purdue University.
