

Lee Van Atta

Mr. Van Atta is a Managing Director in the Leidos Power Transactions group.

Mr. Van Atta has more than 20 years of energy market consulting experience focused on fuel and power infrastructure development, acquisition, and financing. Past projects include support for more than 30,000 MW of power plant development or financing and over \$24 billion of natural gas infrastructure development or financing.

Recently, Mr. Van Atta led Leidos independent market studies on behalf of investors and lenders related to several solar and wind portfolios with assets in ERCOT, MISO, SPP, CAISO and other parts of the WECC, a California energy storage portfolio, and several natural gas-fired development projects in PJM.

Mr. Van Atta has a BS degree from James Madison University and a MPA from The George Washington University.
