

Rick Hunt

Senior Energy Markets Consultant
Leidos Engineering

Rick Hunt is an energy markets expert and consultant focused on energy planning and analytics and nodal market simulation, with over 25 years of experience in the industry. His specialties include nodal market simulation data development, locational marginal price forecasting, economic transmission evaluation, energy markets research and evaluation, wind energy integration and curtailment, and PROMOD IV. Prior to joining Leidos, Mr. Hunt was a product manager at ABB Enterprise Software (FKA Ventyx), where he managed development of data content for the energy market simulation models PROMOD IV, Market Power, Market Analytics – Zonal Analysis, and GridView. In that role, he also developed simulation content, managed data processes, simulation benchmarking and results production, and energy prices for the ABB Power Reference Case. A graduate of the Georgia Institute of Technology, Mr. Hunt holds a B.S. in Electrical Engineering.
