

Mike Della Penna
Google

Mike is an electric power professional focused on building the grid of the future. He currently serves as Google's carbon-free energy project lead, working globally to develop innovative transactions and projects to achieve Google's ambitious 2030 24/7 carbon-free energy goal across the data center fleet. Prior to Google, Mike worked at Pacific Gas and Electric Company for over seven years, where he focused on demand side management programs and energy storage project development. Mike completed his MBA at the UC Berkeley Haas School of Business with a focus on finance.
